The 124th Medical Group Wants YOU

The 124th Medical Group is looking for an exceptionally analytical and motivated enlisted member to fill a traditional TSgt position in the Bioenvironmental Flight. A Bioenvironmental Engineer (4B0X1) performs and manages occupational and environmental health-related activities to include anticipating, recognizing, evaluating, and controlling exposure(s) to chemical, biological, and radiological hazards in garrison and deployed settings. They perform health risk assessments by monitoring and sampling to identify and quantify chemical, biological, radiological, and nuclear hazards. They also provide expert health risk communication to support commander's decision making and to prevent short and long term health effects to all personnel residing and/or working on the installation.

Qualified applicants will meet the following:

- 12 college semester hours of course work in chemistry, including organic chemistry.
- 18 additional semester hours of courses in any combination of chemistry, physics, engineering, health physics, environmental health, biostatistics, biology, physiology, toxicology, epidemiology, or industrial hygiene.
- High school Algebra 1 and English composition are also mandatory.
- The ability to speak distinctly.
- No record of acrophobia or claustrophobia.
- Possess a driver's license.
- Normal color vision and depth perception.
